Professional Summary

Passionate Flutter Developer and CIS graduate with hands-on internship experience at Estarta Solutions. Dedicated to building smooth, responsive mobile apps using Dart, Provider/Cubit, REST APIs (HTTP/Dio), and Firebase. Eager to continuously learn, adopt modern architectures like MVVM, and contribute high-impact code to a collaborative team.

Education

Jordan University of Science and Technology Sep 2022 - Aug 2026
Bachelor's in Computer Information Systems
GPA: 3.64 (Excellent)

Experience

Estarta Solutions Jun 2026 - Sep 2026
Mobile Application Developer Intern

- Built and optimized responsive cross-platform mobile interfaces using **Flutter** and **Dart** following **MVVM** patterns.
- Integrated **RESTful APIs** using **HTTP / Dio** and connected **Firebase** services for seamless data synchronization.
- Managed reactive UI states utilizing **Provider** and **Cubit**, ensuring fast rendering and clean code separation.
- Implemented local data caching and user session persistence using **SharedPreferences**.
- Collaborated actively within an **Agile/Scrum** team, utilizing **Git** and **GitHub** for version control and sprint deliveries.

Projects

Mish Senior (Top 10 AI Hackathon Finalist) | GitHub Repository Oct 2026

- Co-developed an AI-powered technical assessment MVP for fresh IT graduates using **Replit**, **React/Vite**, and **OpenAI APIs**.
- Ranked in the **Top 10** at the Replit & Fikr Ventures Hackathon by rapidly delivering a fully functional conversational interview platform within a strict deadline.

Weather App | GitHub Repository Sep 2026

- Acted as the sole developer, directing full lifecycle development from initial wireframing to API integration and local storage.
- Architected reactive state management via **Provider**, separating business logic from UI and reducing rebuild latency.
- Engineered network service layer using **Dio** to consume OpenWeather **RESTful APIs**, handling custom exceptions, timeouts, and JSON data mapping.

Flutter Spotify | GitHub Repository Jun 2026

- Led the frontend system design, transforming complex Spotify UI layouts into highly modular, reusable Flutter widgets.
- Engineered audio streaming workflows using **audioplayers**, implementing background playback, seek bars, and stateful controls.
- Implemented complete user authentication flows via **Firebase Auth**, including client-side input validation and error handling.
- Built dynamic client-side search filtering and catalog browsing, optimizing widget rendering for smooth scrolling performance.

University Lost & Found System | GitHub Repository May 2026

- Served as the primary mobile developer for the graduation project, driving feature planning, architecture, and team code reviews.
- Built end-to-end cloud infrastructure using **Cloud Firestore** for real-time document sync and **Firebase Storage** for media assets.
- Programmed core query logic for categorized search and status updates (lost/found/claimed), improving match retrieval speed.
- Designed an intuitive mobile user journey with zero UI blocking, handling asynchronous data states and offline error fallbacks.

Technical Skills

Mobile Development: Flutter, Dart, Responsive UI, MVVM & Clean Architecture Concepts
State Management & Networking: Provider, Cubit, RESTful APIs, HTTP, Dio, JSON Parsing
Backend & Local Storage: Firebase (Auth, Firestore, Storage, Cloud Messaging), SharedPreferences
Tools & Methodologies: Git, GitHub, Android Studio, VS Code, Agile/Scrum, OOP, Unit Testing Basics
Other Languages: Python, JavaScript, HTML/CSS, SQL

Certifications

University Training Program: Mobile Development (Flutter) – *Estarta Training Academy* Sep 2026
Mastering Flutter and Firebase for Mobile Apps Development – *Udemy* Mar 2026
Data Analytics and Business Intelligence Technology – *HTUx Platform* Sep 2025

Languages

Arabic: Native Speaker | **English:** Fluent
